Maximum Marks	5 Marks

Coding & Solution

This section evaluates the implementation of the EduGenie AI Learning Assistant, ensuring the application functions correctly, follows clean coding practices, and meets the defined project requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Jinja2, Uvicorn
Key Features Implemented	Question Answering, Concept Explanation, Quiz Generation, Text Summarization, Learning Recommendations
Pending / Incomplete Features	No major pending features
Setup / Run Instructions	install dependencies using <code>pip install -r requirements.txt</code> , then run <code>uvicorn main:app --reload</code> and open http://127.0.0.1:8000 in a web browser.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The EduGenie AI Learning Assistant is developed using a modular architecture with FastAPI, HTML, CSS, and Jinja2. The code is organized into separate modules for Question Answering, Concept Explanation, Quiz Generation, Text Summarization, and Learning Recommendations, making the application easy to maintain, reuse, and extend in future.
