

Solution Architecture

Date	5-7-2026
Team ID	
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level architecture diagram of the EduGenie AI Learning Assistant, showing the Presentation Layer, Application Layer, and Data Layer. Include the technologies and components used in each layer to illustrate how the system processes user requests and delivers AI-powered learning features.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	<i>Provides the user interface for entering questions and displaying AI-generated responses.</i>	<i>HTML, CSS, Jinja2</i>
<i>API Gateway</i>	<i>Receives user requests, routes them to AI modules, and returns the generated results.</i>	<i>FastAPI, Uvicorn</i>
<i>Microservices</i>	<i>Processes user queries and generates answers, quizzes, summaries, and learning recommendations.</i>	<i>Python, Google Gemini API</i>
<i>Database</i>	<i>Stores application data and user information locally.</i>	<i>SQLite</i>
