Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	5Marks

Code-Layout, Readability and Reusability:

This document evaluates the EduGenie AI Learning Assistant codebase for structure, readability, modularity, and reusability. A well-organized codebase ensures easy maintenance, scalability, and future enhancements.

Code Layout Checklist:

S.No	Code Quality Parameter	Followed	Remarks
1	Consistent Indentation	Yes	Proper indentation is maintained throughout the code.
2	Proper File Structure	Yes	Files are organized into modules (main.py, qna.py, quiz_module.py, etc.).
3	Meaningful Variable Names	Yes	Variables use clear and descriptive names.
4	Function / Method Names	Yes	Functions are named based on their purpose.
5	Code Comments	Yes	Important sections include comments for better understanding.
6	Modular Design	Yes	Features are divided into reusable Python modules.
7	No Redundant Code	Yes	Duplicate code is avoided through reusable functions.
8	Error Handling	Yes	Errors are handled using exception handling and validation.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	qna.py	Python	Question Answering	High
2	explanation_module.py	Python	Concept Explanation	High
3	quiz_module.py	Python	Quiz Generation	High
4	summary_module.py	Python	Text Summarization	High
5	learning_path.py	Python	Learning Recommendation	High

Overall Code Quality Assessment

Aspect	Rating (1–5)	Comments
Code Layout & Structure	5	Well-organized modular project structure.
Readability	5	Clear naming conventions and consistent formatting.
Reusability	5	Separate reusable modules for each feature.
Documentation / Comments	4	Sufficient comments and documentation provided.
Overall Score	4.8	Clean, modular, and maintainable codebase.
